

# Swab PS 3910

Made from a two-ply knit polyester that is free of organic contaminants like silicone, amides and phthalates. The polyester layers are thermally bonded to the handle, eliminating the use of contaminating adhesives or coatings. The polyester has low particle and ion content. It has excellent compatibility with most common solvents, including acetone, as well as excellent receptivity. The head is designed for cleaning small, slotted and recessed areas. The excellent cleaning is controlled and supported by a flexible handle.
