

AGMA Alcohol 1 L

1-liter bottle with spray nozzle, 70% IPA, 30% WFI water

70% IPA with 30% WFI water is a well-established and validatable disinfectant for use in the pharmaceutical industry and the healthcare sector. It is routinely used for continuous surface disinfection. When used with dry mops or wipes, it provides an effective, reproducible and cost-effective disinfection solution that integrates seamlessly into existing hygiene concepts.

Features:

- 70% IPA with 30% WFI water is a proven disinfectant that evaporates completely and leaves no residue.
- Tested microbiological efficacy
- WFI-grade water – ultra-pure water
0.2-micron filtered
- Manufactured in a Class C/D cleanroom
- Full traceability with supporting analysis
- 2-year shelf life
- Double-packed
- The product is also available in 5-litre canisters and as pre-soaked wipes.

Item no.:

11009290

ISO class:

ISO 5 and GMP class C/D

Sterile:

—

Direction for Use:

AGMA 70% IPA is designed to help cleanroom operators comply with the standards in Annex 1 and is suitable for use on ceilings, walls, floors, and the hard surfaces of equipment in cleanrooms. Ensure that the surface is completely wetted. Do not use to treat surfaces that are particularly sensitive to alcohol, such as acrylic glass.
